

MCC All Country Specification Management Process Flow

Process Flow Diagram:

1. User can provide comments on all specification and section (attribute) level
 2. Update history maintained at each specification/section level in SP to show changed values

*
 1. All notification will have reminders and escalation mails to specific users, only if the user has not actioned on the notification on time
 2. Supplier notification to consider undelivered email and out of office email back to QA
